Exp. 10

Postlab

1 → To overcome combinatorial explosion in TSP are :
  - Use approximatilon algorithms
  - Employ Heuristic methods
  - Apply metaheuristic techniques
  - Utilize problem decomposition
  - Implement Intelligent pruning

2 → Learning from TSP are :
  - Understand optimization techniques
  - Enhance problem-solving skills
  - Explore Algorithms Design
  - Learn real-world Applications
  - Grasp computational complexity challenges.
